**A learning community in the metaverse for
media and information literacy of adults**

Project Number: 2022-1-AT01-KA220-ADU-000086036

Current Status

After validating the Alpha Version of the Media and Information Literacy Methodological and Competence Framework, the ALiVE project consortium published the final version on the project's website <https://projectalive.eu/>.

Currently, each of the ALiVE project's partners is working on developing the first version of the educational content of one of the 6 Learning Stations that will form the basis for the e-course for Media and Information Literacy of Adults over 45 years old.

Apart from that, after meeting online regularly and after the fruitful conversations made in Cyprus the consortium decided that the best tool for implementing the VLE, considering we are building a Metaverse, is Mozilla Hubs, as it suits our needs best.

Previous Events

After we had a meeting for the Co – Creation Hackathon Event in Cyprus this July, we were finally able to continue our work with finalizing the Curriculum of the e–course that we aim to develop.

Working in small groups, and later discussing what each one thinks, we managed to clarify some small points and find the best possible way to present the content to adults, approaching them in a way that they wouldn't be scared.

Previous Events

The conversations also aimed to conclude on the main characteristics of the ALiVE Virtual Learning Space (VLE), which was decided to follow a story – telling approach, complementary to the content.

Upcoming Events

The partners are about to meet in Syros, Greece for the 3rd meeting of the project, on the 21st – 22nd of November. Altera Vita – Social Cooperative of Cyclades will be the host of this following event.

The objectives of the TPM in Syros, are to monitor the correct and on time development of the Learning Stations.

The participants will cooperate to assess the progress of the work and decide upon the next steps of the ALiVE project. Aiming the best possible result, their skills and knowledge is valuable to point out changes and corrections that should be made in the following months.
